- Supports web-based e-mail clients such as Gmail and MS Office 365
- 256-bit file encryption with DSS Pro audio codec
- Automatic back-up adds extra protection against accidental data loss
- Scalable solution for small and large offices using standalone or workgroup modes

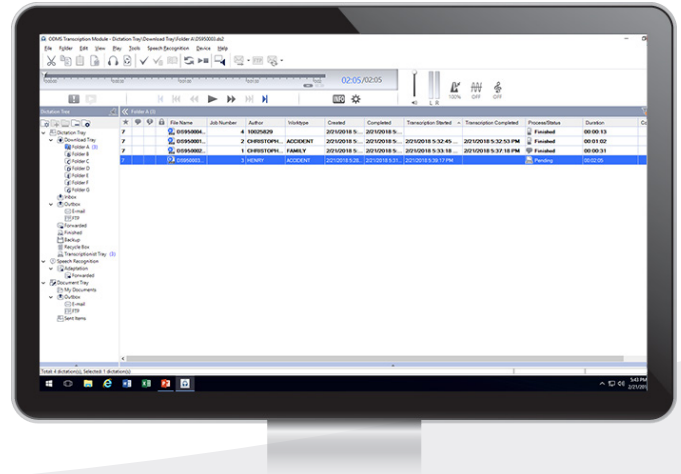

Olympus Dictation Management System (ODMS) Release 7 Software is the virtual coordinator at the heart of an Olympus Dictation Solution.

The ODMS Release 7 dictation/transcription software suite provides an intuitive and enhanced user experience that is capable of handling new efficient workflow capabilities.

The New Start-up Wizard and ability to incorporate the WiFi features of the DS-9500 ensures your organization's success with real-time dictation file sharing and easy implementation. ODMS drives workflow automation in both on-site and off-site environments, incorporating file routing and workflow rules to enhance efficiency. 256-bit file encryption provides the latest security features for ensuring that all shared information is secured and protected in your business. ODMS provides a seamless interface with Nuance Dragon Speech Recognition Software to transcribe your dictation files automatically with back-end speech recognition.

Olympus Dictation Management System Release 7

Newly designed ODMS provides a more intuitive, user-friendly experience to drive enhanced workflow efficiency in a robust scalable solution to meet your business needs.

FLEXIBLE, AUTOMATIC FILE ROUTING WORKFLOW

Dictation files are automatically sent to predetermined destinations via network server, email, or FTP using WIFI, LAN, or USB connection. Transcribed documents are returned with ease to the original authors.

TRUSTED DATA SECURITY THROUGH STANDARD OLYMPUS ENCRYPTION

An instant 256-bit file encryption with DSS Pro-Format secures your dictation and ensures only authorized listeners can access it. Customizable back up feature allows secure storage of your files and protection against accidental data loss.

SEAMLESS INTERFACE TO SPEECH RECOGNITION

Fully compatible with Nuance Dragon Speech Recognition software, ODMS Release 7 seamlessly integrates and allows ease of transcription, further decreasing transcription time.

QUICK INSTALLATION AND CONFIGURATION

The New Start-up Wizard creates a fast and easy process that will get your organization running quickly. It will guide you to set up your network, shared file folders, and/or e-mail settings to route your dictation files to meet your needs.

SIMPLE AND INTUITIVE REDESIGNED USER INTERFACE

Navigate the interface with ease thanks to an upgraded design and intuitive placement of common tools. Boost productivity and efficiency with easily customizable icons and settings to align with user preferences.
