

A woman with her hair in a ponytail, wearing a blue blazer and a gold necklace, is holding a smartphone. She is looking at the screen with a slight smile. The background shows a bookshelf and a window with a view of a city.

**PHILIPS**

**SpeechLive**

Cloud dictation solution

**SPEECHLIVE**

**Speak. Send. Done.**

You speak,  
**we do the typing for you**

# Your personal assistant in the cloud

Philips SpeechLive is the ultimate cloud dictation workflow solution that makes going from your voice to a written document quicker and more convenient than ever before. Access your files via web browser anywhere at any time. Downloading any additional software is not necessary. You can upload, play and download dictation files, send them to your assistant or have them transcribed using speech recognition software or our transcription service with professional, industry-specific trained transcriptionists.

## How it works:

### 01 Record your voice

Record your ideas, tasks and documents wherever you are and send it to SpeechLive. All your recordings are safely stored in the cloud.

### 02 Select your transcription option

Choose whether you want to send your recordings to your assistant, the Philips SpeechLive speech recognition software or the Philips SpeechLive transcription service.

### 03 Receive text file

Save time and resources by letting others do the typing for you. You can receive your recordings as finished text files straight to your email.

## SpeechLive benefits

#### Working anywhere and anytime

Access and manage your dictations through your browser from anywhere. Transcription from home is also no longer a problem, as you can safely use your private computer to playback and transcribe recordings.

#### Highest security standards

SpeechLive offers highly secure online storage thanks to HTTPS protocol, automatic double encryption in real-time, server mirroring and an automatic back up. Keeping your data reliably secured and available at all times.

#### Excellent workflow management

Adapt the solution to your company's way of working. Administrators can easily define authors and typists, as well as assigning the workflow from anywhere in the world, to balance workload.

#### Smooth integration into existing workflows

SpeechLive works perfectly with Philips dictation devices and can easily be implemented into your existing workflow. SpeechLive even supports mixed environments, where not all users have access to SpeechLive.

#### Flexible subscriptions

SpeechLive adapts to suit the needs of your business by giving you the opportunity to adjust the number of users at any time.

# SpeechLive works with smartphones and all Philips voice recorders

You can use SpeechLive with your Philips voice recorder, your smartphone or even both at the same time. The Philips dictation recorder app is part of each SpeechLive subscription. No matter if you are using a voice recorder or your smartphone, you can professionally record, edit and send recordings for transcription directly from your device.

## All your dictations in one place

You can log into your SpeechLive account anytime wherever you are, and access all your dictation files. Download your recordings to your computer, assign them a priority status or send them off for transcription.

## Maximum protection of your files

SpeechLive guarantees the highest protection of your files and keeps your confidential data safe from unauthorized access. The most advanced encryption standard available protects your data during recording, up- and downloading to the cloud. SpeechLive offers double encryption in real-time by using HTTPS protocol.

Our transcriptionists are held to strict non-disclosure agreements. No client information or documentation is shared with anyone.

The automatic backup function protects data against accidental loss. All your recordings are safely stored in the cloud, even when your computer crashes, you suddenly lose internet connection or you accidentally delete dictation files from your device.

Philips only cooperates with renowned data centers for its SpeechLive solution. They received the most important security certificate awards, complying with international, country and industry-specific regulatory requirements.

## Highest level of security

**E-Mail**  
No encryption

E-mail messages can be attacked by hackers, due to unencrypted data being sent via an unencrypted connection.

**Regular cloud**  
Single encryption

Other cloud storages not dedicated to dictation typically only use simple encryption during file upload, but do not encrypt files when stored.

**SpeechLive**  
Double encryption

SpeechLive offers double encryption by using highly secure and industry standard HTTPS protocol. Additionally highest safety standards are guaranteed by always up-to-date security certificates.

# Flexible working

transcribe from anywhere

Philips SpeechLive offers a flexible working environment. If your assistant cannot come into the office one day, they can easily transcribe documents from home by using their private computer. There is no need to download any additional software, all they have to do is to log-into their SpeechLive account. SpeechLive allows your assistants to access the file list and playback the recordings via the web player in their browser, regardless of where they are.

## Foot control for even more flexibility

The new ergonomic foot pedal has been developed by closely studying transcriptionists' movements. It offers the perfect complement to the SpeechLive web player. Transcriptionists can work even faster and more accurately by managing the playback control with a slight movement of their foot tip. The foot pedal enables them to have their hands always free for typing and makes transcribing more comfortable.

# Transcription service

Save time and resources

Hours and hours of valuable time are used every month for typing all kinds of reports, leaving you less time to spend on more important things. Since the average person can speak seven times faster than they can type, Philips has created an innovative solution for you to speak your reports and turn them into documents in no time.

All you have to do is speaking naturally and dictate your documents or reports. Industry-specific trained professionals will accurately transcribe your recordings for you and send the finished document straight to your inbox.

## How long does it take to create one page of text?

One page of text will take you approximately 14 minutes to type up yourself. But the same page can be filled up in only 2 minutes if you speak. Your time is precious and costs valuable resources. Saving time, will help you save money.

## Product highlights

### Accuracy and quality

Our highly trained professional transcribers produce accurate writings which guarantee you the highest possible quality. Your recordings will be thoroughly transcribed and then double-checked by a different team member, to deliver exactly what you expect: perfect results.

### Turnaround and delivery

SpeechLive transcription service is a fast, accurate and high quality transcription service. Transcripts are delivered within 24 hours because we know that our customers value fast turnaround times. Important and urgently needed dictations can be prioritized and delivered within 5 hours. Documents are automatically sent back to your SpeechLive account.

### Security and confidentiality

We value your trust and understand your security concerns when it comes to personal or confidential business documents. To assure the safety and security of all client documents we guarantee maximum data security throughout the whole workflow. Additionally, the most advanced encryption standard available is used to protect your data during upload and download. To protect your privacy, no client information or documentation is shared with anyone.

### Availability and reliability

SpeechScribe offers great reliability. Our professional transcribers are always at your disposal. There are no downtimes due to illness or vacations as it might be the case with administrative staff. SpeechScribe transcription service is always available.

### Multi-speaker transcription

SpeechLive offers the transcription of multi-speaker recordings involving two or more persons. Recordings with multiple speakers might include: interviews, phone conversations, witness statements, press events, meetings, or any other recording situation.

**10 free minutes included**

**Highest accuracy**

# You speak, speech recognition types for you

The speech recognition service allows you to get more work done, in less time. Simply dictate your notes or tasks into your Philips voice recorder or dictation recorder app and have your files transcribed almost immediately by our sophisticated software. Your finished text files will be sent straight to your inbox, saving you time and letting you focus on what is most important. You can save or share your document with your colleagues immediately.
